

ZUBAIR AHMED

SENIOR FULL STACK / AI ENGINEER

Phoenix, Arizona, - Willing to relocate to CA, WA, NY, TX, NJ, NC | creativegeekzubair@gmail.com

PROFESSIONAL SUMMARY

Senior Full Stack/ AI Engineer with 8+ years of experience building scalable web, mobile, and cloud applications for clients including Tapcart, Playboy, American Express, and Sony Pictures. Expert in React, TypeScript, Node.js, Shopify APIs, and AWS, with a track record of delivering high-performance applications and optimizing digital experiences.

Experienced in Generative AI development, including LLM applications, RAG pipelines, embeddings, vector search, and AI-powered solutions deployed on cloud platforms. Skilled in building production-ready APIs, integrating complex third-party systems, and designing scalable software solutions

EXPERIENCE

Senior AI Cloud Engineer, Nailzify

Oct 2025 to Present

- Built an AI-powered customer support assistant using Retrieval-Augmented Generation (RAG), LLMs, embeddings, and vector search to deliver accurate product and business knowledge responses.
- Designed and implemented end-to-end RAG pipelines to ingest, process, and retrieve information from PDFs, documentation, policies, and real-time business data sources.
- Developed semantic search and retrieval optimization strategies using embeddings, metadata filtering, and reranking techniques to improve response accuracy and reduce LLM hallucinations.
- Integrated Shopify APIs and automated data synchronization workflows to maintain an up-to-date AI knowledge base with product catalog, pricing, inventory, and business information.
- Architected scalable AI application infrastructure on AWS, integrating cloud services, backend APIs, LLM orchestration, and production-ready deployment patterns.

Stack: AWS (Bedrock, Lambda, S3, CloudFront, IAM, CloudWatch, DynamoDB, Secrets Manager, WAF), Generative AI, LLMs, RAG, Embeddings, Vector Databases (Pinecone), Semantic Search, Reranking, TypeScript, Node.js, React, REST APIs, CI/CD, Github Actions.

Freelancer/Consultant

Dec 2024 to Oct 2025

- Optimized e-commerce sites for numerous brands, driving a notable increase in conversion rates, user engagement, and retention through data-driven improvements.
- Guided brands in structuring their store architecture within the Shopify ecosystem, ensuring scalability, performance, and ease of management.
- Developed Shopify apps, custom sections, templates, and scripts tailored to each brand's unique challenges, enhancing operational efficiency and functionality.

Stack: Node.js, Shopify APIs, Liquid, ES6, GraphQL.

Full Stack Engineer (React Native/React/Shopify APIs), Tapcart, Inc.

Jun 2023 to Dec 2024

Los Angeles , California

- Translated Figma designs into responsive mobile components ensuring consistent user experience across devices.
- Integrated Shopify Admin Orders API to enable functionalities such as orders and account management.
- Collaborated with product managers and designers to refine user flows, resolve production bugs, and improve overall app usability and performance.

Stack: Node.js, React Native, Shopify APIs, REST APIs, CI/CD, Github Actions.

Senior React Engineer, Playboy, Inc.**Sept 2022 to Jun 2023**

Los Angeles , California

- Participated in new feature development and maintenance of existing features.
- Effectively translated Figma designs into scalable and reusable React components, optimizing overall functionality.
- Leveraged Shopify APIs for efficient manipulation of products, user, and checkout data to improve site experience.
- Assisted in the ongoing development and maintenance of several sites owned by Playboy group.
- Actively involved in Split A/B testing for ecommerce stores, implementing critical improvements based on user engagement and feedback.

Full Stack Engineer (React/Node/AWS), Pipedream Products, Inc.**Apr 2021 to Jul 2022**

Los Angeles, California

- Built a warranty management application with React, Node.js, and Express, enabling customers to register products, upload defect photos to Amazon S3, and submit claims.
- Developed the customer care workflow to request more evidence, review claims, approve or reject requests, and send status emails through Amazon SES.
- Provisioned AWS infrastructure with Terraform, including API Gateway, Lambda, EC2, provisioned Aurora PostgreSQL, RDS Proxy, IAM, and CloudWatch.
- Created PostgreSQL migrations and Bash scripts for database setup, deployments, and smoke tests.

Full Stack Engineer (ReactJS/NodeJS), Sony Pictures Entertainment**Mar 2020 to Apr 2021**

Los Angeles, California

Integrated Material UI reusable components to meet specific project requirements.

- Actively developed new featured for Sony Screeners web app utilizing React JS.
- Developed REST APIs from the ground up, using NodeJS and ExpressJS, to enhance functionality.
- Leveraged AWS for efficient cloud-based deployment.

Full Stack Engineer, American Express**May 2018 to Feb 2020**

Los Angeles, California

- Actively contributed to the development of two internal applications, leveraging the MERN stack for efficient, full-stack development.
- Designed reusable React components for an application.
- Utilized the EJS templating engine for dynamic data rendering on HTML pages, enhancing the application's interactivity.
- Established secure routes for the application using Express JS, incorporating authentication measures for enhanced security.
- Performed CRUD operations by sending HTTP requests to backend APIs via RESTful Web Services.
- Ensured software engineering best practices by actively participating in daily stand-ups and regularly updating backlogs, contributing to the team's agility and productivity.

EDUCATION**California State University, Northridge****Jan 2013 to Dec 2017**

Bachelor of Science (B.S.), Computer Science
